Shipping Documents

Last modified: 04/12/12

All International shipments must be accompanied by the requisite documentation issued by proper governmental authorities. This includes, but is not limited to, proper invoices with all requisite government statements, measures, and labels, packing lists which identify each carton and all other individual commodity statements as may be required.
The shipping documents, as outlined in this section, must be adhered to in order to move your merchandise through the supply chain in a timely and efficient manner. Please read the requirements carefully and if you have any questions, please contact the Foreign Buying Office that handles your account.
